# Endosys CareKIT™ SYSTEM

Specially designed for Laparoscopic Surgery procedures

Endosys CareKIT™ is a versatile system for organizing and protecting surgical instruments and implants. Designed to meet both the growing trend toward standardization of instrument sets and your individualized surgical needs, the CareKIT system can be adapted to all multispecialty services

## Key Features & Benefits

## 5 Reasons to choose endosys trays

### SAFETY

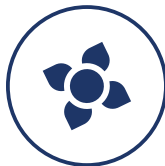

**Safety** of patients and staff by preservation of instrument sterility and closed transport of used instruments

### ECONOMIC

**Economic** advantages due to reusable packaging, low costs of use and long service life

### COMFORTABLE

**Comfortable** handling simple, quick and safe

### QUALITY

**Quality** at a glance - designed to handle fast, contamination-free lid removal when sterile goods are presented for use.

### GREEN ENVIRONMENT

Polymer Trays do not absorb heat so less power is consumed.

# ULTIMATE PROTECTION, CUSTOM BUILD

Enables optimum configuration with two tray levels for laparoscopic instruments

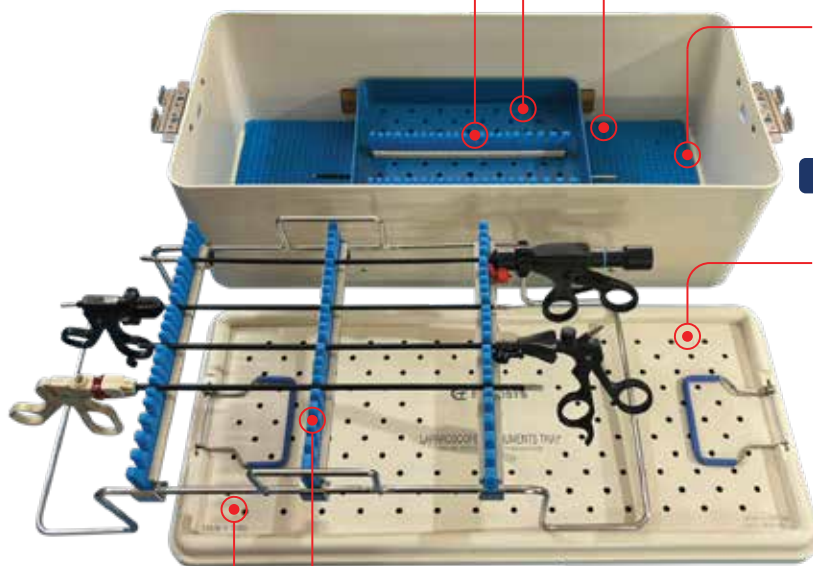

Silicon Holders secure the instruments

Silicon mats protects the instruments from contact with surface

Convenient utility space for accessories

**19-12059MB**

Option of transparent lids to view instruments from outside

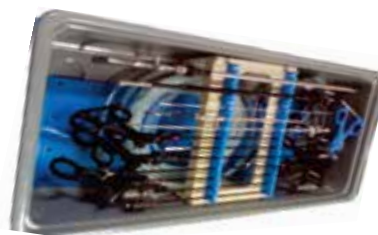

Optional instrument outline guide for easy instrument assembly

Perforated base / tray ensures maximum water and steam penetration for improved washing and drying results

**19-12052D**

**19-12061**

**19-12078**

**19-12011**

**19-12057**

**21-FC248080**

**19-12049**

# SafeKIT – A Multi layer surgery kit

SafeKIT is custom built portable system which enables you to safely store, sterile, and transport your valuable well crafted surgical instruments and costly apparatus in a very systematic manner

SafeKIT is designed to give ease of use and easy to carry with soft handles. All the components in the SafeKIT is made of medical grade polymer and hence biocompatible

SafeKIT is totally air tight and hence suitable for formalin sterilization also. All inner trays come with soft silicon pads and holders to secure your instruments in a customized way and are compatible with steam, ETO, Plasma and cold steam sterilization methods

SafeKIT has multiple chambers to accommodate various accessories as per the specialities
