

SurgiPEN

Sterile Surgical Marker Kit

***The Ideal
Skin Marker for
withstanding
alcoholic
preparations***

SurgiPEN

features a broad or precise fine line for marking during... General, Ortho, Neuro, Plastic, Micro and Vascular surgery, as well as radiology and radiation therapy.

Purifying Lives...

SurgiPEN

- ▶ Surgical Marker, Gentian violet and Methylene blue dye, regular and fine tip, sterile, disposable, packed with 6 inch ruler.
- ▶ The marker's gentian violet and methylene blue ink is non-toxic, non-tattooing, and surgical prep-resistant.
- ▶ Marker's non-abrasive tip minimizes tissue trauma.
- ▶ A separate flexible ruler in the Marker kit is designed to conform to the patient's skin for easier, more precise marking.
- ▶ Ruler is calibrated in both inches and centimeters.
- ▶ Single use is recommended for best results.

Allows the surgeon to demarcate selected site, prior to or during surgical procedures. The skin is usually marked and left to dry for at least 60 seconds prior to scrubbing. Markings can be removed from skin with Isopropyl alcohol.

REGULAR TIP

Varicose Veins
Thyroidectomy
Orthopaedics
General Surgery
Radiology etc.

FINE TIP

Plastic Surgery
Micro Surgery
Intricate general surgery
facial, hand, etc.,
Paediatric surgery
